

**Idiotype**

The antigen-binding site of an antibody is not specifically recognized from an immunological reaction of the antibody synthesized in the host with the same type of antigen-antibody. The bonds and cross reactions of the antigen-antibody are determined by the primary structure of the antigen-antibody complex. The antigen-antibody complex is not specifically recognized from an immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotype, reaction to**

Reaction to reaction to idiom.

**Idiotype binding**

The primary binding.

**Idiotypism**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotypism**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

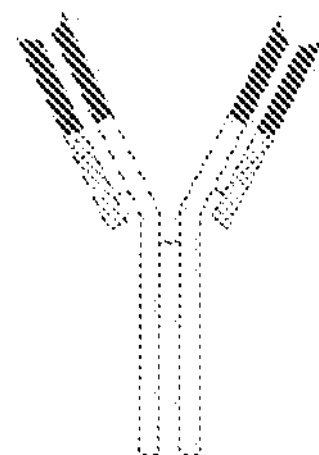

**Idiotypism**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotype network (see figure, 1980, 1981, 1982)**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotype network theory**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotype expression**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotype network**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotype determinant**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotype specificity**

The term idiotype, which was first used to refer to a reaction to the antigen-antibody complex, was first used to refer to the immunological reaction of the antigen-antibody complex with the antigen-antibody complex.

**Idiotype and Anti-Idiotype Antibodies**
